

# Adobe Dreamweaver - Advanced

## Course Aim

Identify the advantages of using CSS and the difference between internal and external style sheets; link a page to an external style sheet; define content sections with `<div>` tags and IDs; and edit CSS rules.

Create and update library items and snippets; create page templates, define editable regions, and apply templates to other site pages.

Create an interactive form and add a variety of input components to it, and set the tab order of form fields.

Check for browser-specific errors using the Check Browser Compatibility feature, and check for and fix accessibility problems.

## Course Prerequisites

Previous experience using Adobe Dreamweaver on a PC or Macintosh is an essential prerequisite for this course.

## Course Duration:

One day: 9:00am - 4:30pm

## Inclusions:

Each participant will receive a comprehensive course manual and relevant exercise files.

## What to Bring:

- Note pad & Pen.
- Examples of work from the office.
- Participants are encouraged to bring along a USB flash drive if they want copies of the work done during class.
