

HTML5 - Basic

Course Aim

Create an HTML document from scratch and define a basic document structure that includes headings and paragraphs. Apply a variety of phrase elements by using various attributes. Embed a style sheet and write basic CSS rules to format HTML. Create and modify tables to display tabular data. Create links to internal and external resources and apply styles to various link states.

Course Prerequisites

Previous experience using applications on a PC or Macintosh and an understanding of internet concepts are an essential prerequisite for this course.

Course Duration:

One day: 9:00am - 4:30pm

Inclusions:

Each participant will receive a comprehensive course manual and relevant exercise files.

What to Bring:

- Note pad & Pen.
- Examples of work from the office.
- Participants are encouraged to bring along a USB flash drive if they want copies of the work done during class.
